LEADERSHIP INSIGHTS

REKHA SRINIVASAN
CEO

As we celebrate **15 years of United Way of Hyderabad**, I am filled with gratitude and pride at the journey we have undertaken together. From our early days of **formation**, through the critical years of **stabilisation**, to becoming a trusted partner in community development, our growth is defined by resilience, collaboration, and an unwavering commitment to impact. We have grown from a two-member team to 250+ member team working in various capacities but with the shared vision and mission.

Over the past decade and a half, we have mobilized resources, forged partnerships, and empowered communities across education, health, livelihood, environment, and women's safety.Each milestone reflects the collective strength of corporates, government bodies, NGOs, and citizens who have stood with us in the spirit of **"Living United."**

Yet, anniversaries are not only moments of reflection - they are also opportunities to **reimagine the future**.

As we look ahead, we have chosen to **rewrite our mission for the next 10 years**:

To **deepen our impact** by scaling sustainable solutions that address systemic challenges.

To **strengthen partnerships** with corporates, philanthropists, and civil society, ensuring that collective action remains our driving force.

To **embrace innovation and technology** in solving social problems, making our interventions more measurable and scalable.

To **champion equity and inclusion**, ensuring that vulnerable communities are not just supported but empowered to thrive.

The next decade will be about **growth with purpose** - expanding our reach while staying rooted in transparency, accountability, and measurable outcomes.

As we step into this new chapter, I extend my heartfelt thanks to our donors, partners, volunteers, former colleagues and team members. Together, we will continue to build a stronger, safer, and more equitable society for all.

> *"The 'non-profit' institution neither supplies goods nor services. Its 'product' is neither a pair of shoes nor an effective regulation. Its product is a changed human being... a child that learns, a young man or woman grown into a self-respecting adult; a changed human life altogether."*
>
> **– Peter F. Drucker**

Dr. PENDYALA KIRANMAI DUTT
Chairperson

Founded in 2010, United Way of Hyderabad (UWH) has evolved from a local volunteer network into a premier orchestrator of collective social impact. By bridging corporate CSR donors, tech ecosystems, and government frameworks, UWH has mobilized over ₹170 crores to transform 1.35 million lives.

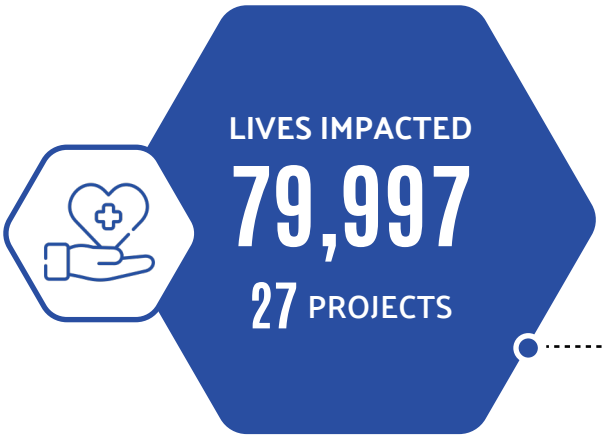

Its historical impact centers on scalable social innovations like the Thrive10 acceleration program with T-Hub, which fast-tracks market access for grassroots' health, aggrotech, and education startups. Simultaneously, UWH drives dedicated women's incubator funding, supporting pre-incubation pathways, digital literacy, and micro-enterprise capital to move rural and urban women into sustainable livelihood generation.

By 2035, UWH will look like an AI-driven, climate-resilient venture philanthropy network. Transitioning aggressively into climate tech partnerships, UWH's future footprint centers on scaling circular economy models, farm-level solar refrigeration, and smart lake restoration.

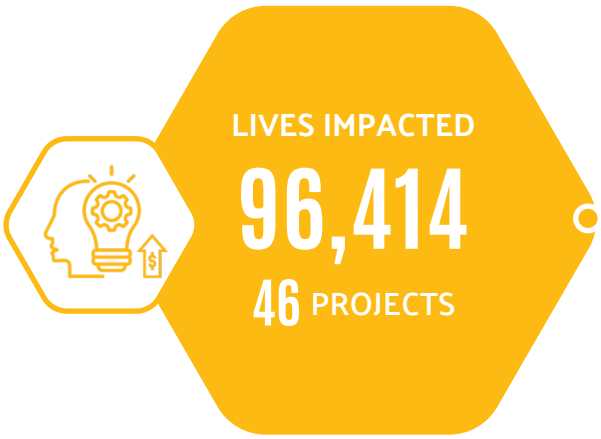

The organization will act as a decentralized Web3 funding mechanism where corporate donors directly finance hyper-localized, tech-driven climate adaptations. Its women's incubators will evolve into autonomous, green-tech hubs - powering thousands of female entrepreneurs managing distributed renewable energy grids and tech-enabled waste-to-value supply chains across the region.

ENVIRONMENT SUSTAINABILITY

Overview (Key Interventions in 25-26)

HEALTH & WELL-BEING

W-Core Breast & Cervical Cancer Screening

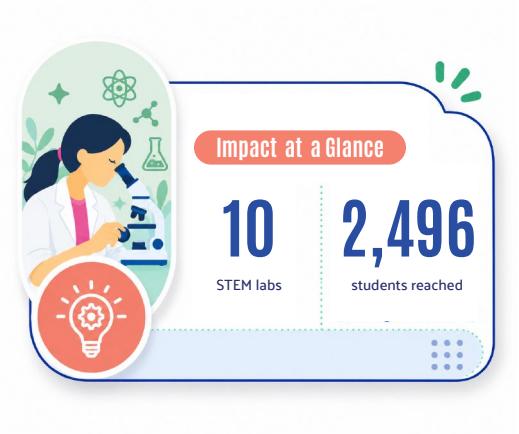

▲ Promoting preventive healthcare through breast and cervical cancer screening

The **W-CORE (Women's Cancer Outreach, Resource and Education)** initiative advanced women's health through cancer awareness, early detection, and preventive healthcare interventions across vulnerable communities in Telangana. Through **50 screening camps,** breast and cervical cancer screening was made accessible to women, supporting early detection and awareness, while **19 HPV vaccination camps** enabled **1,680 adolescent girls** and young women to access preventive care, promoting early intervention and reducing the long-term risk of cervical cancer.

EDUCATION & EMPOWERMENT

Curiosity Lab: Transforming STEM Education

▲ Students enthusiastically explore the Curiosity Lab during its inauguration

The Curiosity Lab initiative strengthened STEM education in **10 government schools** across **Warangal and Madurai,** creating engaging learning environments through curriculum-aligned STEM laboratories. The project reached **962 studentsin its first year,** while equipping **18 teachers** with experiential teaching methodologies. By integrating hands-on learning into classrooms, the initiative nurtured curiosity, critical thinking, problem-solving, and scientific temper among students from underserved communities.

LIVELIHOOD & SKILLING

Threads of Hope – Women's Handloom Skill Development Programme

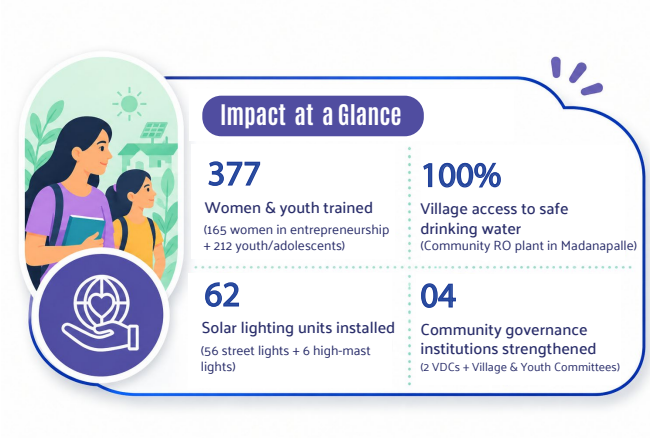

▲ Women artisans from showcasing naturally dyed warp tie-and-dye yarn

The **Threads of Hope – Weaver Protection Project** strengthened the livelihoods of women artisans in **Yadadri Bhuvanagiri, Telangana,** by preserving traditional weaving skills while creating sustainable income opportunities. The initiative trained **46 women** in pre-loom and weaving activities, **23 women** in natural dyeing, and provided **27 aged, single women, and persons with disabilities** with assistive weaving equipment. By promoting market linkages, facilitating access to government entitlements, and encouraging skill enhancement, the project empowered artisans to achieve greater economic resilience and preserve their craft for future generations.

COMPREHENSIVE COMMUNITY DEVELOPMENT PROGRAM

Strengthening communities through livelihoods, skills & infrastructure

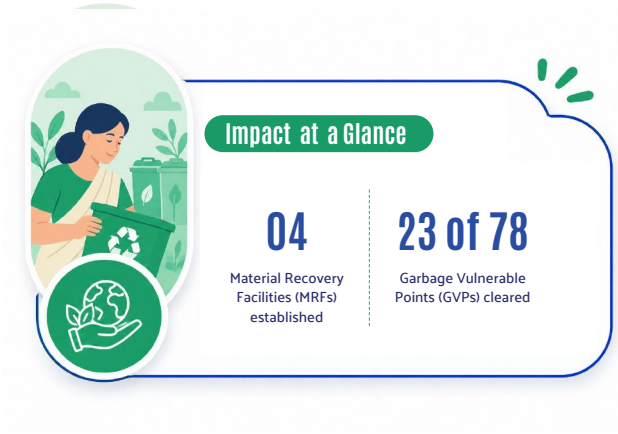

▲ Community RO plant, providing safe drinking water to over 2,500 residents

Across **Rangareddy and Mulugu districts**, CCDP interventions are strengthening rural and tribal communities through a community-led approach focused on **governance, livelihoods, skills and essential infrastructure**. The initiatives supported **102 livelihood enterprises and work units**, strengthened women's entrepreneurship, expanded youth learning opportunities, improved access to safe drinking water and introduced sustainable solar infrastructure. Together, these efforts are fostering greater economic resilience, community ownership and safer, more inclusive spaces while creating foundations for long-term, sustainable development.

Overview (Key Interventions in 25-26)

ENVIRONMENT SUSTAINABILITY

Empowering leadership & frontline workforce in Solid Waste Management

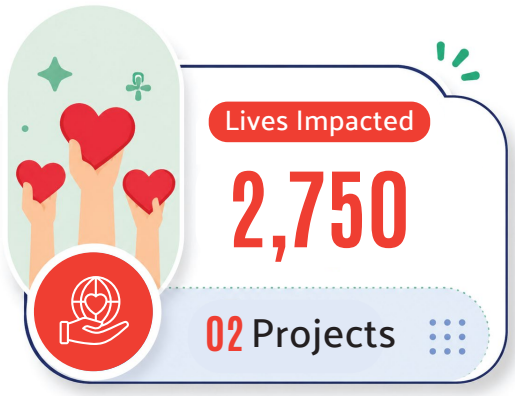

▲ Capacity-building session on waste segregation for sanitation staff

The Comprehensive Solid Waste Management initiative empowered communities across **6 villages** and **1,500 households** to adopt source segregation, recycling, and scientific waste management practices. The project enhanced waste management practices and community-level segregation, achieving **5–6%** segregation of waste at source, and conducted **33 community awareness activities,** fostering **100% community participation** and driving lasting behavioural change towards cleaner, healthier, and more sustainable villages.

DISASTER RELIEF & REHABILITATION

From emergency response to resilient recovery

▲ Supporting flood-affected communities through relief kits and the restoration of government schools.

When the floods came, the need was immediate. The response evolved with the community. Following the August 2025 floods in Mulugu District, emergency relief reached vulnerable families across **10+ affected mandals and villages**, with **495 essential kits** distributed based on identified needs. As communities began rebuilding, rehabilitation efforts restored **three government schools and three community RO plants** in Kalwapalle, Rajannapet and Gandhi Nagar, while **10 flood-affected families** received livelihood support. Together, the initiatives reached **2,750 people**, helping communities restore essential services, livelihoods and hope for a more resilient future.

Beneficiary Stories

HEALTH & WELL-BEING

Rebuilding Connection and Wellbeing - Padmavathi

After experiencing the loss of her husband and both sons, **Padmavathi**, an elderly Sahridaya beneficiary, found herself increasingly isolated. Joining the **Sahridaya Elderly Community Club** gave her a renewed sense of connection and belonging. Through regular games, celebrations, physical activities and peer interactions, she gradually became more engaged and socially connected. Today, Padmavathi looks forward to each club gathering - a space that has brought companionship, participation and renewed joy into her everyday life.

Empowering potential through sport & inclusion - Pendyala Mamatha

With fellowship and coaching support, **Pendyala Mamatha** gained the opportunity to train consistently, compete at higher levels and pursue her sporting aspirations with greater confidence and financial stability. Her journey has strengthened her resilience, independence and self-belief, culminating in an outstanding achievement - **World No. 5 and Asian No. 4** in her para-athletics category. Mamatha's story demonstrates how inclusive opportunities can go beyond sporting success, fostering dignity, confidence and the freedom to realise one's potential.

EDUCATION & EMPOWERMENT

Innovation for Safer Lives - Shaniya

When Shaniya, a Grade 9 student from ZPHS Peddamberpet, learned how delayed medical attention often costs lives during cardiac emergencies, she was inspired to find a solution. Through the **Alochya (Ideation 1.0) initiative,** she designed a **Smart Wrist Band** that continuously monitors heart rate and blood oxygen levels. In the event of a suspected heart attack, the device automatically alerts family members and nearby healthcare providers with the user's live GPS location. Shaniya's innovation reflects the power of STEM education to nurture empathy, critical thinking, and problem-solving, empowering young learners to develop technology-driven solutions for real-world challenges.

From Learner to AI Innovator – Tina

For Tina, a Class 9 student at CM Shri School, Ashok Vihar, Artificial Intelligence once felt like something only experts could understand. Through the **Delhi AI Grind program,** she discovered that innovation begins with curiosity. Interactive, hands-on learning enabled her to build a **Smart Waste Management solution** addressing local environmental challenges. As her technical skills grew, so did her confidence. Today, Tina has transformed from a hesitant learner into a confident innovator, proving that with the right opportunities, young minds can leverage AI to solve real-world problems and shape a better future.

COMPREHENSIVE COMMUNITY DEVELOPMENT PROGRAM

Leading Community Action for Water Security - Sudarshana Tokare

As an ASHA worker and trusted community member, **Mrs. Sudarshana Tokare** played a pivotal role in mobilising villagers during the Solar-Based Lift Irrigation Project in Gram Panchayat. By building awareness, encouraging voluntary participation and fostering collective ownership, she helped drive the project's implementation. The initiative is expected to strengthen access to water for agriculture, domestic needs and livelihoods, while improving agricultural productivity and easing water-related challenges for local families.

Reviving Tradition Through Innovation - Komala

For Komala Chandhana of Inmulnarva, pottery was more than a livelihood - it was a family tradition. Yet, the physically demanding process of mixing clay by hand limited production and affected her health. Through United Way Hyderabad's **Entrepreneurship Development Program,** she gained business management skills and received a clay mixing machine that transformed her enterprise. Today, she produces around **20 pots a day,** earning approximately **₹1,000 daily** after expenses. Her journey demonstrates how the right blend of technology, skills, and enterprise support can preserve traditional crafts while creating sustainable livelihoods.

Turning collaboration into community change - Deshavath Lalitha

As Sarpanch of **BK Uppununthala**, Deshavath Lalitha witnessed her village's challenges - from unsafe drinking water and inadequate lighting to limited livelihood opportunities. Working alongside the **Gram Panchayat and Village Development Committee (VDC)**, our partnership helped address these needs through improved water and solar infrastructure, agricultural support, nutrition assistance and livelihood linkages. Today, the village is better equipped with essential services and opportunities, demonstrating how **local leadership, community participation and collaboration can drive lasting change**.

DISASTER RELIEF & REHABILITATION

Rebuilding Livelihoods, Restoring Hope

When devastating floods swept through Gandhi Nagar, a small grocery shop owner lost not only his business but his family's sole source of income. Through United Way of Hyderabad's Flood Rehabilitation Initiative, he received a fully stocked kirana kit that enabled him to reopen his shop and rebuild his livelihood. Today, his business is thriving once again, providing financial stability for his family and renewed confidence for the future - demonstrating how timely livelihood support can accelerate recovery and restore dignity after disaster.

LIVELIHOOD & SKILLING

Weaving Hope, One Thread at a Time - Nikitha

When Konda Nikitha was diagnosed with breast cancer, her world came to a standstill. Between intensive chemotherapy sessions and mounting medical expenses, she worried about supporting her young children and easing the financial burden on her family. Despite her health challenges, she enrolled in the Weaving Dreams training programme. Encouraged by dedicated trainers and fellow participants, she persevered and successfully learned weaving. Today, Nikitha is confident that the skills she has acquired will help her earn a sustainable livelihood, restore her financial independence, and rebuild hope for her family's future.

From Uncertainty to Opportunity - Vishnu CG

For **Vishnu CG**, education represented a pathway to a more secure future. After completing his B.Tech in Artificial Intelligence and Data Science, he joined the **Data Centre Academy**, where technical training, mentorship and workplace-readiness sessions helped him build practical skills and confidence. Moving away from home, he embraced new challenges and remained committed to learning. His perseverance paid off when he secured a **Data Center Technician internship at Microsoft with a ₹7 lakh annual package**, opening new possibilities for his career and family.

ENVIRONMENT SUSTAINABILITY

Driving Efficient Conservation - Narendar

Keeping a zoological park running smoothly requires timely maintenance and reliable infrastructure. For **Mr. Narendar** from the Electricity Department at **Nehru Zoological Park,** the battery-operated loader vehicle has transformed daily operations. The vehicle enables the team to quickly reach maintenance sites while carrying essential tools and equipment for emergency repairs across the expansive campus. With **zero maintenance issues over the past year,** it has become a dependable, eco-friendly asset that enhances operational efficiency while supporting the park's broader biodiversity conservation efforts.

Cultivating Hope, Harvesting Resilience - Lakshmi Devi

After losing her husband, Lakshmi Devi, a smallholder farmer from Kondampally, single-handedly supported her two children through rain-fed groundnut farming. Enrolling in the **Agroforestry Project** marked a turning point. With **75 grafted horticulture saplings, technical training, soil testing, and support for intercropping through MGNREGA,** she began diversifying her farm and strengthening her livelihood. Today, Lakshmi looks to the future with renewed confidence, aspiring to improve her family's financial stability and provide better educational opportunities for her children.

SOCIAL INNOVATION: Bridging ideas with impact (2025-26)

What if innovation could begin with listening to communities? Our Social Innovation Vertical brings communities, innovators and partners together to identify real challenges, co-create solutions and take promising ideas to scale. By combining community insights, expert mentorship, market access and partnerships, we help innovations reach those who need them most–creating sustainable impact beyond one-time interventions.

List of selected startups

Mitrasena / Biowall Agrihealth
Enables farmers and FPOs to produce affordable biological crop inputs on-site, supporting soil health, lower costs and regenerative agriculture.

Vayujal Technologies
Generates safe drinking water from air through decentralised, energy-efficient Atmospheric Water Generators for water-stressed communities and institutions.

GAV Square Educational & Healthcare Solutions
Provides personalised special education, therapy and teacher training to create more inclusive learning environments for neurodivergent children.

ColdEasy / Temperate Technologies
Provides affordable, electricity-free cold storage to help farmers and vendors reduce post-harvest losses and strengthen livelihoods.

DeepConnection Innovation
Uses AI-powered infrastructure to enable accessible developmental screening, diagnosis, intervention and monitoring for children with neurodevelopmental needs.

ShelterSquare Foundation
Creates pathways to dignified, affordable housing and integrated support for low-income migrant workers in urban and industrial communities.

Stealthera
Develops affordable AI-powered medical wearables enabling continuous monitoring, fall detection and early health alerts for older adults.

ANSHAP Services
Develops AI-powered emotional wellbeing tools that enable early identification, personalised support and scalable mental-health care for students and professionals.

Wheel Ease Private Limited
Develops affordable assistive mobility solutions that enhance independence, reduce physical effort and improve participation for wheelchair users.

Kidaura Innovations
Uses AI and interactive games for early developmental screening, while enabling therapists, educators and parents to manage interventions digitally.

WAY FORWARD

As we enter our next chapter after **15 years of impact**, we look ahead with renewed ambition, building on our strengths while sharpening our strategic focus. Agility, responsiveness and adaptability will continue to guide our work as we deepen our expertise and scale approaches that create meaningful, lasting impact.

Over the next five years, our programmes will increasingly focus on **building the resilience, agency and capabilities of individuals and communities** to anticipate, adapt to and navigate a rapidly changing world shaped by climate-related disasters, migration, displacement and socio-economic transitions.

We will invest in **adaptive, evidence-led and locally relevant solutions**, strengthening partnerships and knowledge-sharing while creating opportunities to test, learn, document and scale what works.

Diversifying our resource base will be a key priority. Alongside CSR partnerships, we will explore greater engagement with family foundations, the Indian diaspora and HNIs, while building a long-term organisational corpus. Access to flexible and patient capital will enable greater investment in innovation, research, organisational development and capacity building.

By **2031**, we aspire to be a stronger, more resilient and influential organisation - recognised for understanding emerging challenges, developing relevant solutions, demonstrating what works and creating pathways for scale. We move forward carrying the values that have shaped our journey: **the courage to explore, the agility to adapt and the commitment to create lasting impact**.

COMPLIANCE

The organisation continued to strengthen its governance and compliance framework during the year, with a strong emphasis on transparency, accountability and institutional responsibility.

There was **no change in the Governing Board** during the year. Quarterly Board meetings and the Annual General Meeting were conducted in accordance with the organisation's Bylaws, ensuring continued oversight and governance.

All **statutory payments and regulatory obligations** were completed within the prescribed timelines. Two internal audits and the statutory audit were successfully completed as scheduled, reinforcing financial discipline, transparency and internal controls. The organisation also successfully secured the **renewal of its 12A and 80G registrations**, reaffirming its continued compliance with applicable regulatory requirements.

Beyond statutory compliance, the organisation invested in strengthening its internal systems and policies. This included enhancing **data security and protection measures**, re-modelling **payroll processes to align with changes in Indian labour laws**, and reviewing and updating local and international travel policies to strengthen approval mechanisms and responsible utilisation of organisational resources.

These efforts reflect our continued commitment to building a **well-governed, compliant, secure and accountable institution**, while continuously strengthening the systems that support our mission and long-term sustainability.

CAUSE AREAS WE SUPPORT

We work on all causes that deter individuals from achieving fullest potential.

People & communities are central to our work

HEALTH & WELLBEING

- Health literacy and screening for school children
- Community Health and Wellbeing program
- Cancer screening & awareness
- Senior Citizens Community Club

EDUCATION & EMPOWERMENT

- School Transformation
- STEM Interventions
- Early Childhood Education
- Scholarships & Mentorships
- Sports Education & Sponsorship

LIVELIHOOD INTERVENTIONS

- Job readiness (large scale)
- Entrepreneurial Skilling & value addition units
- Technical skilling (Social & Tribal welfare institutions)
- Micro-credit linkages

ENVIRONMENT SUSTAINABILITY

- Increasing green cover
- Water Conservation
- Renewable Energy
- Waste Resource Management

COMPREHENSIVE COMMUNITY DEVELOPMENT

- Empower community based organizations
- Build or Improve Community Infrastructure
- Access to rights and entitlements

SUPPORT TO STARTUPS IN SOCIAL IMPACT SPACE

We fund and mentor social startups in the space of :

- Health tech,
- Edu tech,
- Grass root livelihood innovations
- Sustainability

SUPPORT TO DONORS

ENGAGEMENT & OUTREACH

- Employee Engagement
- Employee Payroll Giving
- Leadership Engagement
- Thought Leadership
- Disaster Response

INVESTING IN SOCIAL IMPACT PROGRAMS

- Proposal Writting
- Project Implementation (PAN India)
- Compliance Check
- Monitoring & Evaluation
- Impact Report & Audit
